

*Planned* BATHROOMS & KITCHENS

MATCHED DESIGNS BY

KOHLER OF KOHLER

*Wise is the home owner* WHO  
CHOOSES KOHLER FOR LIVELY, MATCHING  
DESIGNS AND IN-BUILT EXCELLENCE

KOHLER styling makes it possible for home owners to carry out an important principle of small room decoration—that a bathroom must have unity to have distinctiveness. KOHLER fixtures, each with individual beauty, are so related in line, proportion and color, that they complement each other in matched ensembles.

Spirited matching designs are available in the entire range of fixtures, so that the inexpensive bath in the small home, too, may be appealing as well as practical.

With all manufacturing at KOHLER, there is a centralization of supervision reflected in products of highest quality, which cost no more than others.

A permanent KOHLER mark is fused into the enamel or glaze of each fixture and pressed into each fitting. Be sure to look for this mark of genuineness and of responsibility.

Before you build or remodel, consult your Plumbing Contractor. And be sure to visit the nearest KOHLER display room, if possible. *A Deferred-Pay Plan makes financing easy.*

# Kohler Colors and Design

The modern bathroom is as American as the Goddess of Liberty, and the name "Kohler" as significant of quality as the torch she holds in her hand.

Present day plumbing is functional and forthright. It is straight of line and clean of detail. It is neither Georgian nor Victorian, French Provincial, nor Early American, but in a house or apartment of any period it is a handsome essential.

Through the use of Kohler color—instead of period design—the bathroom can harmonize with its surroundings. For enduring beauty and satisfaction Kohler pastels stand high in popular favor—the soft texture of the Tuscan, a more delicate shade in the Ivory, a slightly deeper tone in the Autumn Brown, the grayed quality of the Peachblow, a Cerulean Blue that is dusty, not strident.

Basically good colors, agreeable under artificial as well as natural light, must be selected both for the fixtures and the background—colors that are easy to live with.

To achieve the most satisfying color interest between the bathroom and bedroom, serious thought must be given to this problem when the new house or apartment or remodeling job is still in blue print form.

The following pages show likely decorative schemes for bathrooms. For hints on colorful kitchens, turn to pages 18 and 19.

## *Matched Styling* AT ITS BEST

**Fixtures:** Cosmopolitan K-526-CF recess Bench Bath; Gramercy K-1850-BA vitreous china lavatory with "neatness shelf," metal legs and Wall-free towel bars; Walcot K-2200-BA vitreous china dental lavatory; Integra K-3610-PB one-piece closet.

The problem of the two-door bathroom is here solved by grouping the fixtures closely, with all hot water outlets on the same inside wall to save on piping and protect from freezing. A Kohler Compact radiator, recessed under the window to meet cold as it enters, keeps the bathroom comfortably warm.

A true recess with dropped ceiling, lighted from above and faced with Vitrolite to ceiling height, focuses importance on the tub. Vitrolite continues around the room as a wainscot, drawing the other fixtures into the picture. Above the wainscot the walls are wallpaper, in which is repeated the Peachblow of the fixtures.

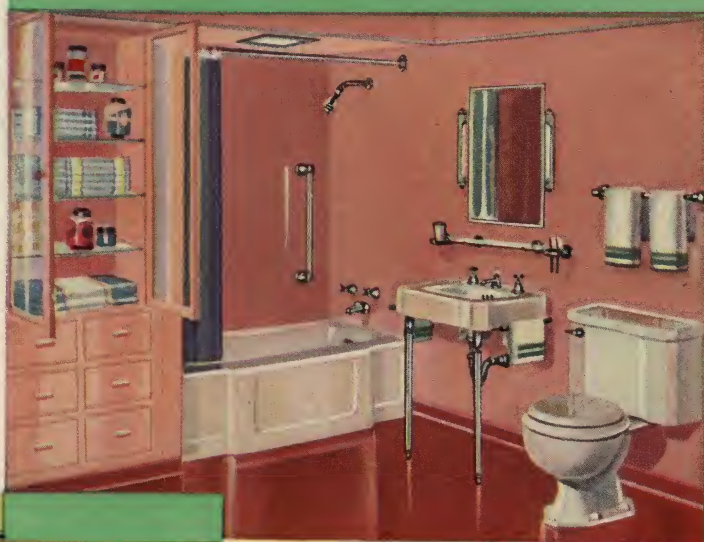

*Right*—Here function dictates both plan and decoration. Outlets for lavatory and bath have been concentrated on one wall for economy in piping, and the end wall of the recess forms a booth for the closet. Rubber covers walls around the tub and behind the lavatory; paper used on other walls and the soffit reduces material costs. Fixtures are in Spring Green.

**Fixtures:** Cosmopolitan K-526-CF recess Bench Bath; Chesapeake K-1910-C vitreous china lavatory with metal legs and Wall-free towel bars; Bolton K-3665-PB closet.

*Right*—A recess bath with shower fitting, enameled iron lavatory, close-coupled closet . . . all first quality, but low in cost. There's economy in piping when all three outlets are on one wall. Glass-doored shelves and roomy drawers provide storage space. White fixtures lend themselves to any color scheme—here rose, with accents of peacock blue.

**Fixtures:** Cosmopolitan K-526-CA recess Bench Bath; Westchester K-2625-F enameled cast iron lavatory with metal legs and Wall-free towel bars; Wellworth K-3705-PB closet.

*Left*—Adroit use of color with white fixtures has endowed this practical room with a charm of its own. Inexpensive, but effective materials are used for decoration: low-priced chromalin on the floor; wainscot of painted presdwood; upper walls of painted plaster.

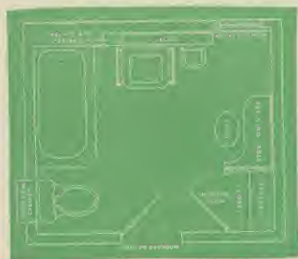

**Fixtures:** Cosmopolitan K-526-CI recess Bench Bath; Hampton K-2720-BA enameled cast iron lavatory with Wall-free towel bars; Trylon K-3745-PB closet.

## FIXTURES THAT *Enliven* THE HOME

**FIXTURES:** Cosmopolitan K-554-CM bath; Jamestown K-1770-F vitreous china lavatory with metal legs and Wall-free towel bars; Walcot K-2200-BA vitreous china dental lavatory; Placid K-3600-EB one-piece closet.

Thoughtful planning distinguishes this spacious bath-dressing-room.

Just inside the door welcome space for towels and accessories is provided by built-in shelves and cupboards. Recessed niche over the tub—wide offset ledge above lavatory and dental basin serves to remove piping from the outside wall for protection against winter freezing.

Decoration sounds a subtle change upon the popular red, white, and blue theme: Burgundy and white tile, an effective stage for Cerulean Blue fixtures. A shower curtain of wine-red silk and stacks of blue towels warm the snowy reaches of white walls.

*Left*—The same tub, matched with lower priced lavatory and closet is used for this condensed version of the original floor plan—the hot water piping concentrated on one wall for economy. Tuscan fixtures; floor, cadet blue linoleum, walls of presdwood, shower curtain and accessories of coral.

**Fixtures:** Cosmopolitan K-554-CF corner bath; Jamestown K-1780-F vitreous china lavatory; Channel K-3655-EB closet.

*Right*—The vitality of the color scheme (suited to a northern exposure) provides contrast for the white fixtures: floor of coral linoleum; ceiling and walls painted a lighter tone. Around tub and in back of lavatory grey linoleum carried to a height of 7 feet; walls protected against splashing in the vulnerable spots only at a saving in cost.

**Fixtures:** Cosmopolitan K-554-CA corner bath; Westchester K-2610-C enameled cast iron lavatory on pedestal and with Wall-free towel bars; Bolton K-3665-PB closet.

*Left*—Inexpensive decoration need not mean a drab room. Floor of rose linoleum with border and base of French Blue . . . papered walls . . . ceiling and other accents sustaining the blue note . . . a fresh and charming background.

**Fixtures:** Cosmopolitan K-554-CP corner bath; Hampton K-2710-BA enameled cast iron shelf lavatory with metal legs and Wall-free towel bars; Wellworth K-3705-PB closet.

## A *Lavette* FOR

## DOWNSTAIRS CONVENIENCE

**Fixtures:** Strand K-1870-BA vitreous china lavatory with "neatness shelf," metal legs and Wall-free towel bars; Integra K-3610-PB quiet, one-piece closet with Hygienic sheet-covered seat to match.

A sustained chord of blue with white accents gives this engaging lavette a serene, feminine character which is emphasized by the dainty flounced dressing-table. Fixtures are Peachblow.

A lavette contributes immeasurably to family comfort, easing bathroom traffic during rush hours, permitting the training of children in habits of hygiene, with less fuss. It offers convenience to party guests; to the invalid and to the elderly.

Not much space is needed either; an area of 3'x4' at the end of a hall or a little-used closet will do very well.

# Times Square

## FOR DISTINCTIVE BATHROOMS

Times Square appeals to those who want something distinctive—in design, shape, size—in roomy tub bathing and safe, care-free showering. Its dimensions—4'x4'—open up possibilities in the planning of unusual master baths, frequently permitting the architect to make more effective use of space and to provide extra closets. Appealing also are its practical features: larger than average basin, low sides—only 16 inches high—flat bottom, built-in seat.

The Times Square meets the need of the leisurely tub bather, vigorous shower bather, foot bather, the elderly, the mother with small children.

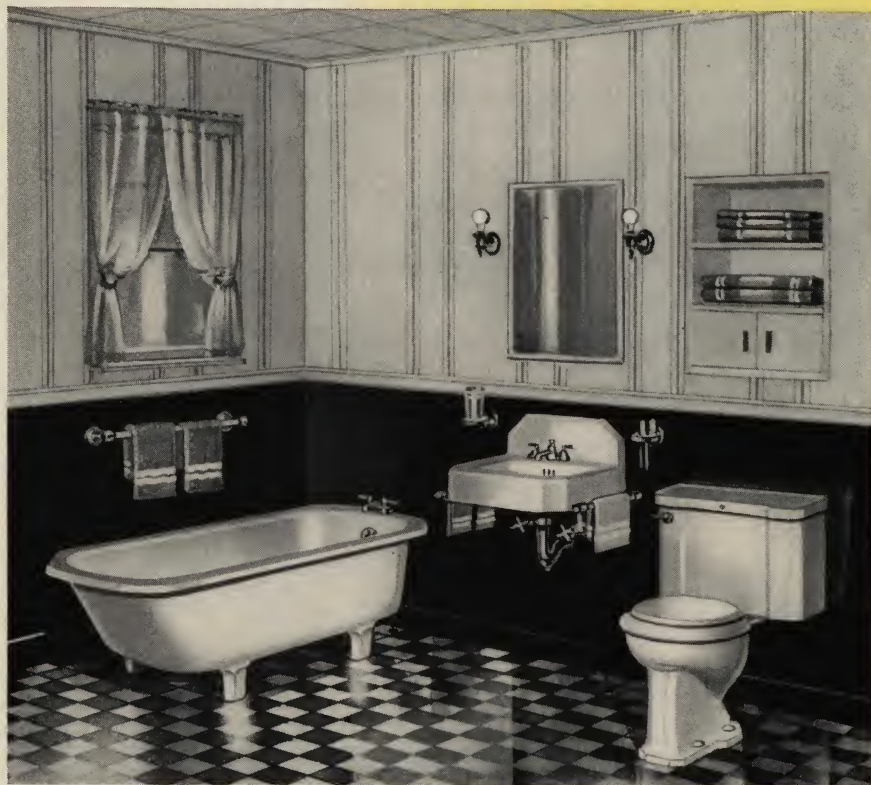

Recess model only. K-206-CF is shown.

### WITH *New* TRITON FITTING

A grand new feature, which replaces separate valves! Mix the water to correct temperature by turning a single handle, test, then raise the knob on the spout and water is diverted to the shower head. When water is shut off, knob drops so that water will again pass through spout, making unintentional operation of the shower impossible.

## CONVENIENCE AT MINIMUM COST

**FIXTURES:** Liberty K-1000-T free-standing bath; Hudson K-2805-C enameled cast iron lavatory with Wall-free towel bars; Trylon K-3745-PB closet.

This attractive bathroom emphasizes economy of installation and decoration. Minimum piping is achieved by setting all three fixtures against the same wall. This compact arrangement is especially suitable in the small bath in low-cost homes, for it makes the most of limited floor space. These fixtures are of same high quality as other Kohler fixtures shown in preceding bathrooms.

A simple decorative treatment, carried out with practical, inexpensive floor and wall materials, gives an effect of dignity and good taste.

# ALL-BRASS KOHLER *Fittings* ASSURE MATCHING DESIGN AND BETTER PERFORMANCE

Since fittings are the vital working parts, the importance of equipping Kohler fixtures with adequate, substantial, all-brass fittings cannot be over-emphasized. Designed and engineered for Kohler fixtures, and in many instances built-in at the factory, Kohler fittings assure better value.

Kohler fittings are all-brass, with no alloy substitutes; bodies are sturdy and full size with large, smooth waterways and threads which are deep and cleanly cut for long service. Double-action threads assure quick opening and closing. Compactly-cast bodies receive a preparatory coat of nickel before plating, producing lustrous, long-lasting chromium surfaces.

Each fitting part passes many exacting inspections, and the completed product is tested under high water pressure for performance.

Kohler manufactures two styles—the popular, graceful Metropolitan and the massive Signet. Both designs have beauty of form and proportion to harmonize with Kohler fixtures—both have easy-to-use modern handles.

The name Kohler is die-stamped into all fittings, so that they may be readily identified. Accept no substitutes!

## MATCHING *Vitreous*

Kohler vitreous china lavatories have a vitality of design that is impressive. Generally, the top surfaces are flat so as to be usable; lines are clean and lively; basins are deep and roomy; spout outlets are above highest point of rim to avoid back siphonage.

In white or in colors, the vitreous china fixtures harmonize

**GRAMERCY.** *Left top.* A lavatory which excites admiration. Built-in chromium plated mixer fitting with pop-up drain; metal legs; Wall-free towel bars. Sizes 22x18", 24x20". K-1850-BA. Also wall hanging without legs, K-1855-BA.

**STRAND.** *Left.* A narrow, space-saving fixture for small rooms. Built-in, chromium plated mixer fitting with pop-up drain; Wall-free towel bars. Sizes 20x14" (note small front-to-back dimension); 26x15½". K-1875-BA. Also with metal legs, K-1870-BA.

*Neatness Shelf*

**CUB.** Its size, only 12x12", makes it a favorite for trailers, offices, tourist camps, small washrooms. Built-in chromium plated mixer. K-1895-BA.

# your LAVATORIES FOR ENDURING APPEAL

with enameled fixtures to create sets that are matched and decorative.

Although many types of lavatories are available, the basic principle of all is *functionalism*. The best examples of this are the Gramerey, Strand and Cub which give the user a clear, full-length "neatness shelf."

Regardless of size or price every Kohler vitreous china piece is made of finest imported ball and china clays, fired for long periods of time at high temperatures. The result is a non-absorbent thoroughly vitrified fixture with a glass-hard surface that is clear and smooth.

**JAMESTOWN.** *Right.* An answer to: "Give me a flat-top lavatory with space around the basin." Combination, chromium plated mixer fitting with pop-up drain, metal legs; Wall-free towel bars. Sizes 20x18", 24x20", 27x22". K-1770-F. Also available on pedestal with various type fittings.

**CHESAPEAKE.** *Lower, right.* With 5½-inch wide "neatness ledge." Compact, chromium plated mixer fitting with pop-up drain; metal legs; Wall-free towel bars. Sizes 20x18", 24x20". K-1910-C. Also wall hanging without legs, K-1915-C (20x18" only).

**GREENWICH.** Has 6" high splash-protecting back; hot and cold chromium plated faucets; pop-up drain. Sizes 20x10", 24x20". K-2050-J.

# MATCHING LAVATORIES WITH

**HAMPTON.** *Above.* Matched styling and utility at a modest cost. Has a  $4\frac{1}{2}$ " wide "neatness shelf" (in larger size). Built-in chromium plated mixer fitting with pop-up drain; metal legs; Wall-free towel bars. Sizes 19x17", 22x19". K-2710-BA. Also wall hanging without legs, K-2720-BA. With cabinet, K-2715-BA.

**WESTCHESTER.** *Right.* The flat, roomy top provides convenient space for toilet articles in use. Chromium plated compact mixer fitting with pop-up drain; metal legs; Wall-free towel bars. Sizes 20x18", 24x20", 27x22". K-2600-C.

The lavatories shown on these pages have a base of cast iron. Time and usage have demonstrated that the non-flexing strength of this material is necessary to long life. It provides a surface to

**TRAVELER.** *Below.* "Baby brother" of the Hampton. For trailers, small office washrooms, filling stations, rest rooms, camps, very small lavettes. 3" wide shelf. Built-in chromium plated mixer fitting; chain and rubber stopper. Size 13x13". K-2750-BA.

# LUSTROUS *Enameled* SURFACES

which enamel adheres tightly when applied by the dry process under intense heat. Smooth, lustrous, enduring surfaces are characteristic of all Kohler lavatories.

These fixtures are available both in regular and in acid-resisting enamel. The latter finish costs only a little more, but is worth the difference because it resists the injurious effects of medicines, lemons, vinegar and certain toilet preparations.

Designs are fresh, and match other Kohler fixtures to form *planned sets*.

Wall-Free Towel Bars

## **MARSTON.** *Right. New!*

The corner lavatory in modern mode.  $7\frac{1}{2}$ " shelf, at widest point. Chromium plated mixer type fitting with pop-up drain. Good for undersized lavettes. Size 16x16" (sides). K-2920-BA.

## **HUDSON.** *Below.* Has a 6"

high "splash-protector" back. Low in cost; handsome in its matched design. Compact, chromium plated mixer type fitting; pop-up drain. Sizes 20x18", 22x19". K-2805-C.

**BRETTON.** Inexpensive but of high quality. 6" back; chromium faucets. 19x17", 21x18". K-2880-P.

**NAROBOL.** For corridor-type rooms.  $5\frac{1}{2}$ " back; chromium faucets. 26x14". K-2900-M.

## K OF K CLOSETS

The closet should be quiet, sanitary and efficient. K of K closets not only meet these requirements, regardless of type or price, but are pleasing and clean cut in design. It's wise economy to buy the best closet you can afford.

**PLACID.** *Left.* The best, one-piece, siphon jet available anywhere. Elongated bowl; free standing; sheet-covered seat. Height 27", width 22", front to back 29½". K-3600-EB.

**INTEGRA.** *Above.* A good, one-piece, reverse trap with round front bowl. Free standing; sheet covered seat. Height 27", width 22", front to back 27½", K-3610-PB.

**CHANNEL.** *Above.* Best in close-coupled closets. Siphon jet; free-standing; sheet covered seat. Height 28½", width 22". K-3655-EB elongated, K-3655-PB round front; front to back 29¾" and 27¾" respectively.

**BOLTON.** *Left.* Good close-coupled reverse trap type; free-standing; sheet covered seat. Height 30", width 21¾". K-3665-EB elongated, K-3665-PB round front; front to back 30" and 28" respectively.

**WELLWORTH.** *Left.* Most popular of all close-coupled closets. Reverse trap round front. Free standing. TriKo coated seat. Height 30", width 21¾", front to back 26½". K-3705-PB.

## DOUBLE DUTY— COMBINING SINK AND LAUNDRY TRAY

These fixtures, designed specifically for the apartment kitchenette, are deservedly popular with owners and tenants. A recent installation is at Parkchester—world's largest housing project in Bronx, New York City.

The dish-washing basin is 8" deep; the clothes washing 13". 3" ledge; 4" back; chromium plated, swing spout mixing faucet.

**SEA CLIFF.** *Above left.* On metal cabinet, sizes 36x25", 42x25", 50x25". K-6607-A with sink at left. K-6608-A, sink at right. Also available on adjustable legs or without legs for building in.

**CAMBORNE.** *Above right.* 8" sink basin; 14" laundry tray, 8" back. Adjustable legs. Sizes 42x24", 50x24". K-6625-A with sink at left. K-6626-A, sink at right. Also without legs for wall hanging.

**ELSWICK.** *Above.* Two-part laundry tray for the home. Enameled inside; swing spout mixing faucet; strainers with rubber stops; angle iron supports. Length 48", width 20", depth 13 $\frac{1}{4}$ ". K-6880-A.

**TRYLON.** *Left.* A practical and inexpensive washdown type. Close coupled; round front; free standing; TriKo coated seat. Height 29 $\frac{1}{2}$ ", width 21 $\frac{3}{4}$ ", front to back 26 $\frac{1}{2}$ ". K-3745-PB.

**TRENT.** *Left.* A low-cost washdown type with round front bowl and tank attached to wall. TriKo coated seat. Height 34 $\frac{3}{4}$ ", width 20 $\frac{3}{4}$ ", front to back 27". K-3750-PB.

## THE *Pride of the Home* - A CHEERFUL

Camberley K-5555-A acid resisting enameled cast iron ledge sink on cabinet. Metal wall and floor cabinets to match.

Vigorous colors enliven this kitchen, with its corridor plan of calculated efficiency for easier house-keeping. There's plenty of counter space, and all equipment (sink, range, and refrigerator) is strategically coordinated to conserve time and energy.

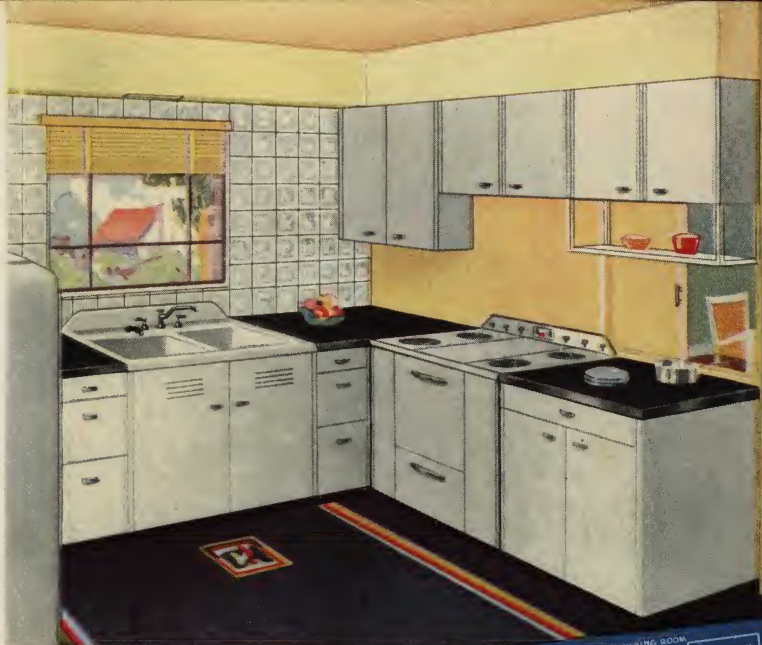

A breakfast table is set apart by the useful stub partition; low enough not to block light; wide enough to serve as a buffet; deep enough to provide roomy cupboards for housing china and electrical equipment.

The Tuscan of the sink is repeated in cabinets and woodwork . . . black table and counter tops . . . wallpaper in terra cotta is the cue for striped chintz curtains and other accents.

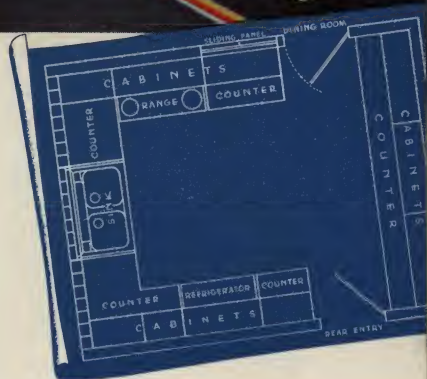

The U-shaped plan routes kitchen traffic in logical sequence. Deliveries may be left next to entrance; perishables stored immediately in the refrigerator; staples in base and wall cabinets nearby. The sink—hub of the kitchen—is placed at the center.

Kitchen efficiency is well exemplified here in ample counter space surrounding each major unit.

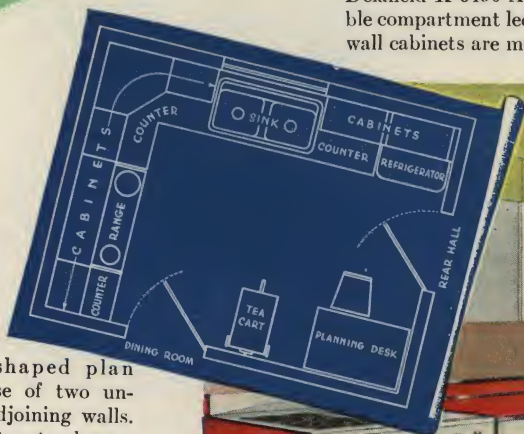

Wellwin K-5595-A acid-resisting enameled cast iron double compartment ledge sink with built-in fitting. Matching floor and wall cabinets.

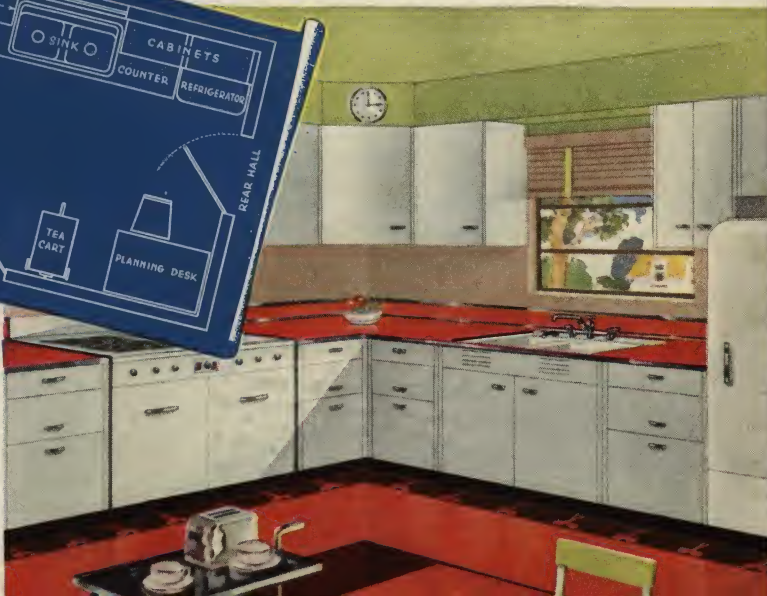

## MODERN KOHLER KITCHEN

Delafield K-6490-A acid-resisting enameled cast iron double compartment ledge sink, with built-in fitting. Floor and wall cabinets are metal.

The L-shaped plan makes use of two unbroken adjoining walls. Refrigerator stands near the entrance. The sink, with integral ledge and twin 8-inch basins, is neatly built into counter-top to form the focal point for this modern kitchen.

# THESE HAVE THE *Neatness Ledge*

**CAMBERLEY.** Favored by a high percentage of women is the two-drainboard sink of which the Camberley is our most popular model. It is only 54" long but has two 17" drainboards, and a 20" wide 8" deep basin. The ledge is 3" wide; the back 4" high. Chromium plated swing spout mixing faucet; spray hose with cool-grip handle; Duostrainer. Acid-resisting enamel. Metal cabinet with four drawers and three compartments. Sizes 54x25", 60x25". K-5555-A. Less cabinet for building in, K-5550-A.

**WILSHIRE.** A handsome six-footer with two 18½" long drainboards and two 8" deep basins, plus a 3" wide ledge. Low 4" back; chromium plated swing spout mixing faucet; spray hose with cool-grip handle; two Duostrainers. Acid-resisting enamel. Metal cabinet. 72x25". K-5505-A. Less cabinet, K-5500-A.

**CYMBRIA.** Here's a model which gives one the definite advantage of an integral drainboard in a 42" length. Basin is 8" deep; ledge is 3"; back 4". Chromium plated swing spout mixing faucet; Duostrainer. Acid-resisting enamel. Metal cabinet. 42x25". K-5576-A. Sink at left, K-5575-A. Without cabinet, K-5570-A and K-5569-A.

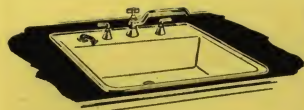

**WELLWIN.** Use this twin-basin sink where adjoining counter tops are possible. One basin is meant for washing dishes, the other for stacking. Duostrainers. 3" wide ledge, 4" back; chromium plated swing spout mixing faucet; Acid-resisting enamel. Metal cabinet. Size 42x25". K-5595-A. Without cabinet, K-5590-A.

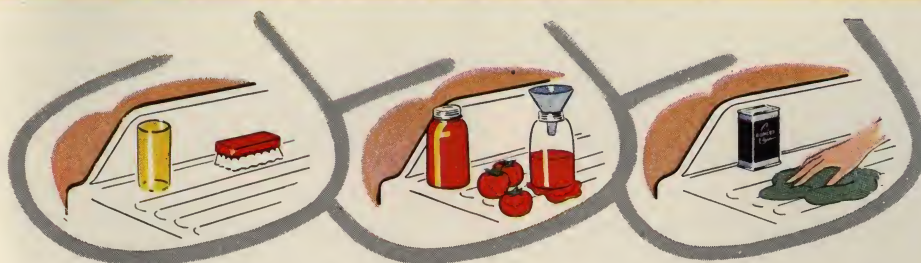

# BUILD THESE INTO COUNTER TOPS

**DELAFIELD.** *Right.* This new sink for building-in has an integral ledge forming a sanitary, water-proof base for the fitting. Two 8" deep basins each with Duostrainer; chromium plated swing spout mixing faucet; spray with cool-grip handle. Acid resisting enamel. Sizes 32x21", 42x21". K-6490-A. Also single basin Mayfield (above) sizes 24x21", 30x21". K-6510-A.

**ASHLEY.** *Right.* This model can be installed with a (1) counter top or (2) wall fitting. Two 8" deep basins each with Duostrainer; chromium plated swing spout mixing faucet. Acid-resisting enamel. Sizes 32x20", 42x20". K-6500-A.

The "neatness ledge" allows for an orderly arrangement of things used at the sink—glasses, brushes, cleansers, etc. It is 3" wide and as long as the sink itself. The 4" back permits installation under low windows.

**ALL KOHLER KITCHEN SINKS ARE IN ACID RESISTING ENAMEL ONLY for BETTER SERVICE AT LOWERED COSTS.** The finish is more than a mere surface coating — it's acid-resisting clear through the enamel. Fruit and vegetable acids, cleansers and alcohol won't discolor or destroy the smooth lustrous enamel.

Kohler ledge sinks are one-piece with no ugly, hard-to-clean joints. Drainboards are depressed to prevent water from spilling over. Ends are squared for neat, water-proof building into counter tops.

# Low Cost SINKS STYLED FOR MODERN, SMALL KITCHENS

mium plated swing spout mixing faucet with raised spout for greater clearance; squared corners for building into wood or steel cabinets. Size 54x22". K-5700-A. Also with metal cabinet.

**HOLIDAY.** Above. With one 21" long drainboard and one 8" deep basin. Acid-resisting enamel; 6½" back; chromium plated swing spout mixing faucet with raised spout. Size 42x20". K-6080-A. Sink at left, K-6079-A. Also with metal cabinet.

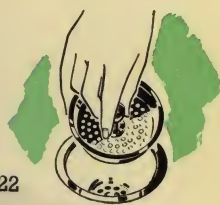

**TRIMM.** Above. The small apron sink in a new design. Acid-resisting enamel. 21¼" long drainboard; 8" deep basin with Duostrainer; 6½" back; chromium plated swing spout mixing faucet with raised spout. Size 42x20". K-6150-A. Sink at left, K-6149-A.

**DORCHESTER.** Above. A big, low-cost sink. Acid-resisting enamel. Two 19" drainboards, one 6" deep basin with Duostrainer; 8" back; chromium plated swing spout mixing faucet with raised spout. Size 60x22". K-6060-M. Also with metal cabinet.

**BERKSHIRE.** Above. One drainboard; one 6" basin with Duostrainer. Acid-resisting enamel; 8" back; mixing faucet. 42x20", 52x20" K-6136-M. Sink at left, K-6135-M. Also with metal cabinet.

*Left.* Duostrainer has a removable strainer in which waste particles collect, making disposal easy and orderly. By lowering knob-handle, the drain can be closed.

*Right.* For greatest service and satisfaction, use only Kohler Cleanser on Kohler fixtures. Cleans thoroughly, safely, quickly. Not injurious to hands. At your plumbers.

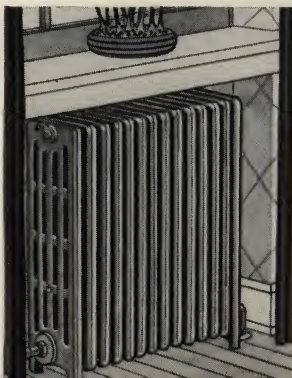

# KOHLER *Radiant Heating* FOR THE MODERN HOME

## "22" OIL BURNING BOILER

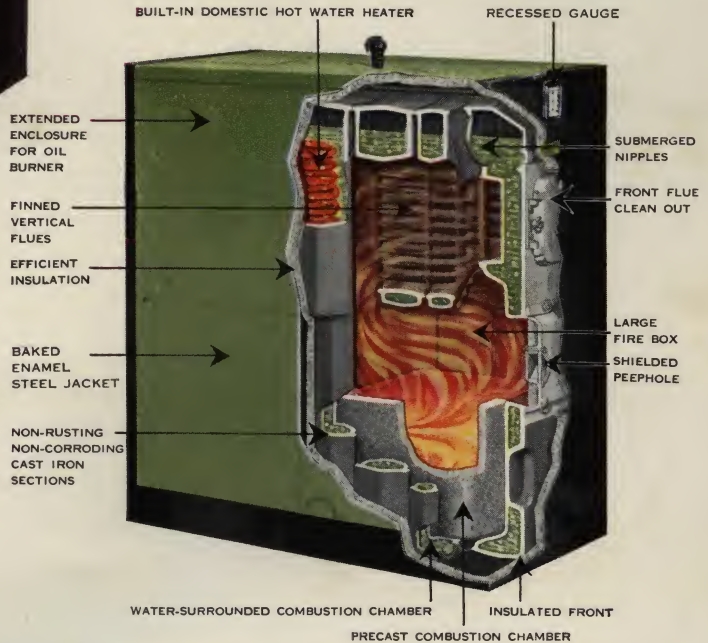

The stand-out feature of the "22" is the wet-base; water circulates around the fire box to absorb *all* radiant heat thus saving fuel and stepping up efficiency. Other features: finned flues—built-in water heater for domestic hot water—effective insulation—color and class.

Other types in a complete range of sizes are available, and we invite you to write for complete heating book, "Radiant Heating for the Modern Home." Or see your heating contractor about Kohler boilers and radiators which establish new high standards of efficiency and economy.

## TYPE "G" COAL BURNING BOILER

Consider this boiler if you are not sure about your future heating preferences since the "G" can be used for hand, stoker or oil firing with good results. Embodies most modern innovations of boiler engineering: large upper nipples submerged for adequate circulation—heat trapping flues—heat-retaining insulation—built-in water heater for domestic hot water. Colorful, compact, and good looking.

## SMALL, GRACEFUL, EFFECTIVE RADIATORS

New Kohler "Compact" cast iron radiators are specially designed to give concentrated, compact heating surfaces. They are smaller, lighter in weight, and emit far more heat in proportion to their size than radiators of the larger tubular type. Their slender, graceful lines and small space requirements make them particularly adaptable to recessing under windows, thus conserving floor space and at the same time meeting the cold where it enters the building.
